

# InterOil and Cairns

## “Opportunities in Exploration and LNG”

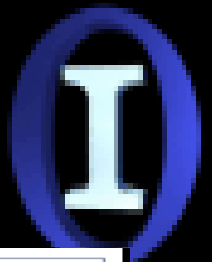

# Who is InterOIL ?

- A developing vertically integrated energy company operating three distinct business segments
- Upstream---Exploration and production
- Midstream---Refining operations
- Downstream---InterOil Products Ltd (retail distribution, service stations, aviation support)
- Publically listed on the NYSE
- 1300 employees
- Offices in Cairns, Port Moresby, Singapore and Houston (USA)

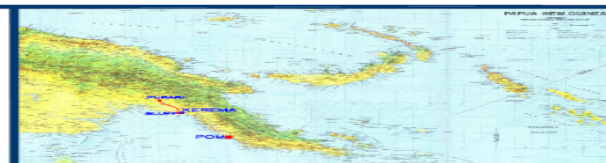

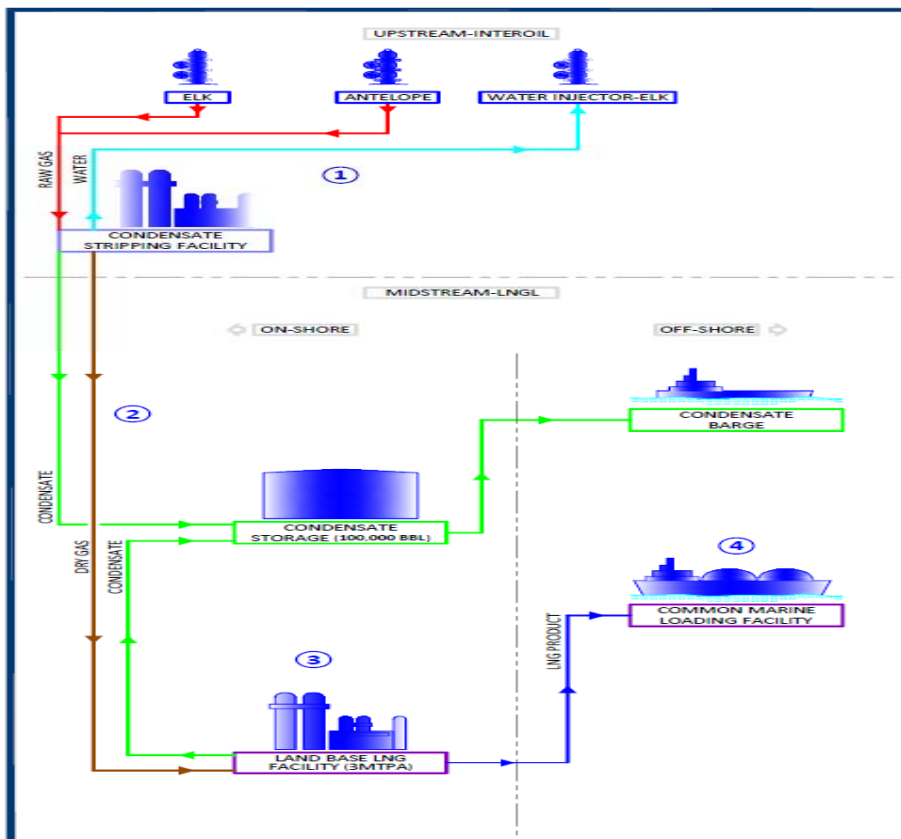

# Gulf LNG Project Description

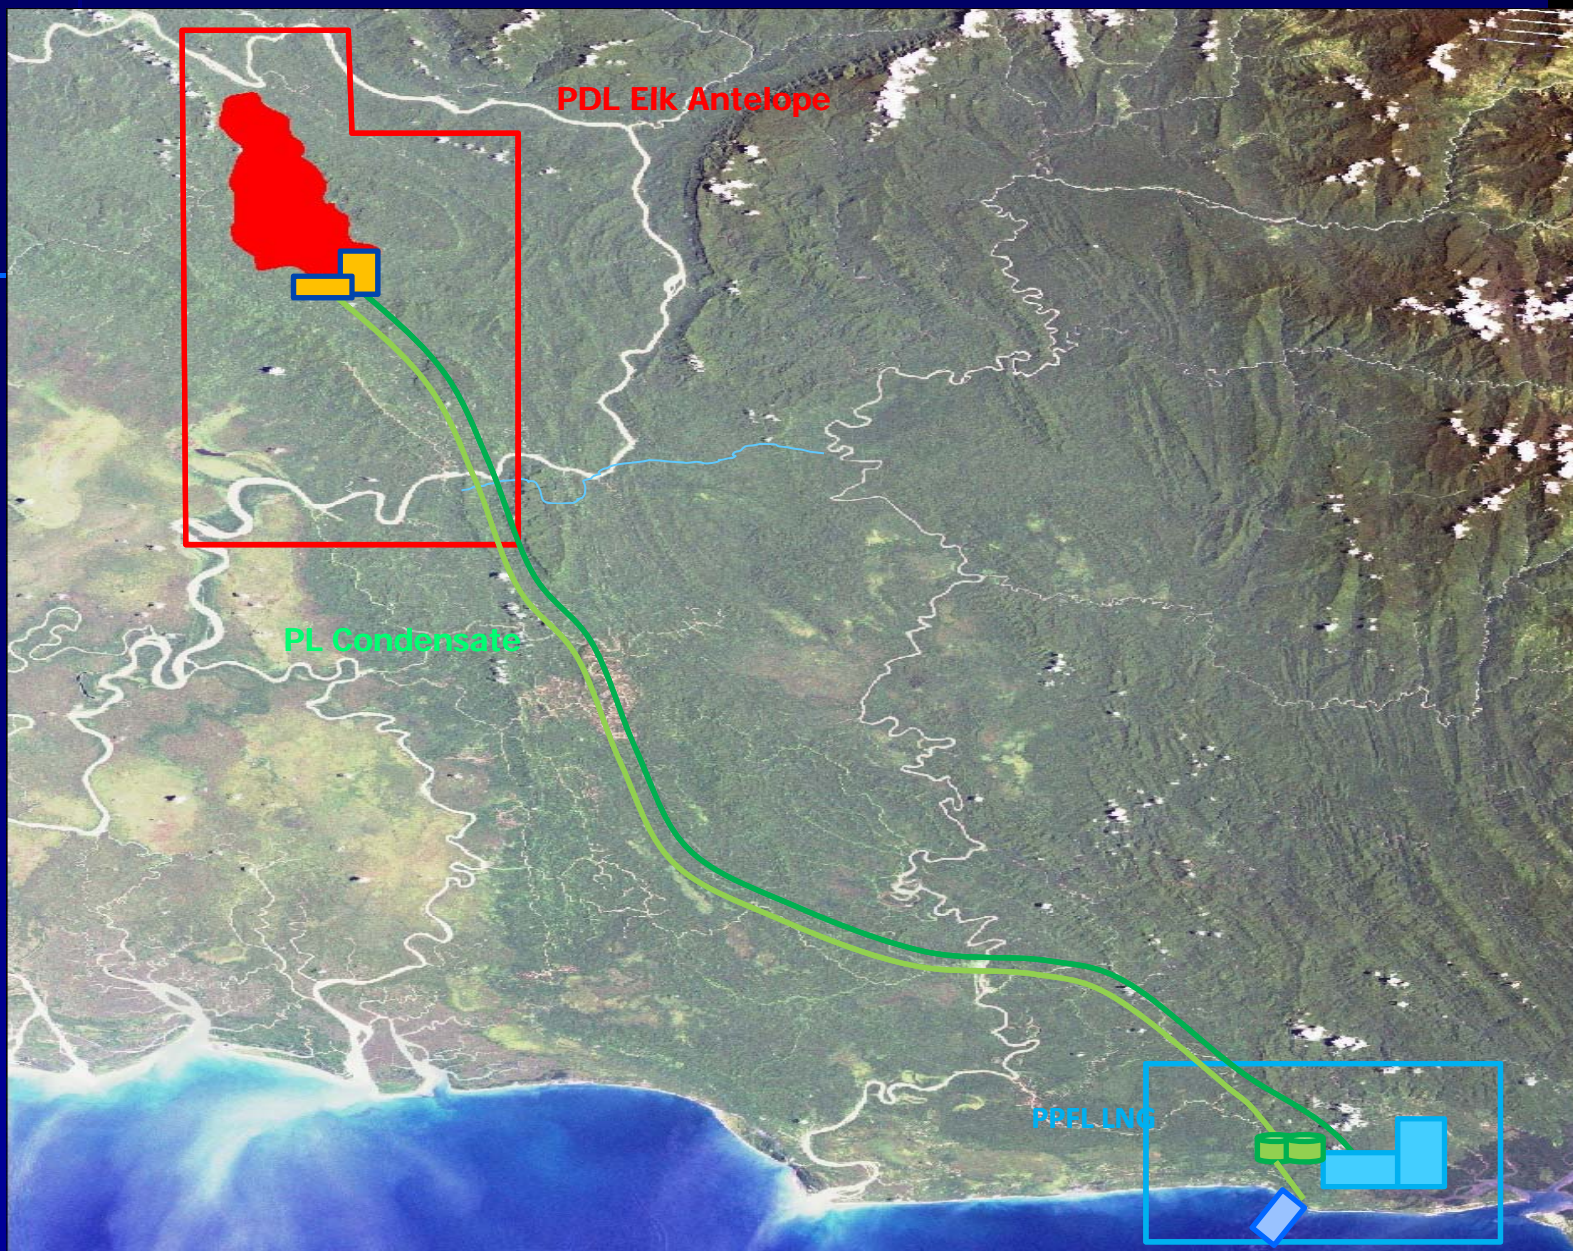

## The Gulf LNG Project

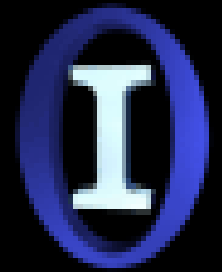

Main components of the project are:

- ① **Production & Preparation of the Gas.**
  - Field Condensate Stripping Plant (CSP) will process raw gas from several production wells in Elk & Antelope gas fields. Extracted produced water will be re-injected back into Elk formation. Dry gas will be piped to LNG complex at Gulf coast. Condensate will be piped to the coast for transportation to the Napanapa Refinery.
- ② **Transportation of the Gas & Condensate.**
  - 32" x 120km Dry Gas Pipeline from CSP to LNG Complex at Bluff.
  - 12" x 120km Condensate Pipeline from CSP to Storage & Barge loading facility.
- ③ **Liquefaction of the Gas.**
  - Land Based Liquefaction Plant located onshore at Bluff with LNG capacity of 5MTPA.
  - Condensate storage capacity of 100,000 bbl's at Bluff.
- ④ **Shipment of the Gas & Condensate.**
  - Marine Loading Facilities for LNG & Condensate. Condensate shipped to Napanapa Refinery. (Port Moresby)

## ➤ Where are the opportunities

- EPC contracting
- Sub contracting engineering fabrication, electrical other
- Personnel recruitment services
- Medical services
- A range of professional services to existing providers
- Business investment opportunities
- “Back office” functions for PNG operators
- Education services

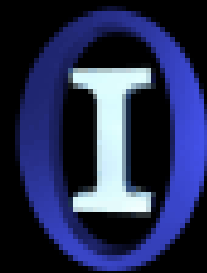

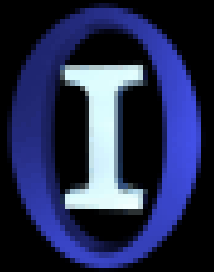

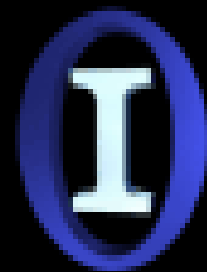

**Thanks and any  
questions?**
