1. INTRODUCTION

The following paper is designed to collate data on long-term population statistics for Cairns.

Early data up to 1958 is drawn from a paper prepared by the Cairns City Council Town Clerk of the time, probably prepared about 1959 or 1960.

Figures from 1958 onwards come from Australian Bureau of Statistics (ABS) Year Book and other ABS population releases.

Up until 1976, the figures are for the old Cairns City Local Government area. From 1976 on, the ABS defined the Cairns Statistical District as the Cairns urban areas in both Cairns City and Mulgrave Shire and areas likely to be urban on a 15-year time frame. This definition commenced bringing in significant sections of Mulgrave Shire. This boundary was adjusted in 1991 to include the whole area from Gordonvale to Palm Cove, ie. the amalgamated Cairns City area less Yarrabah and the Babinda areas. The ABS provided estimates on the new boundaries back to 1986.

Up to 1976 figures, no distinction is made between residents and visitors and it can be assumed that the figures include visitors. From 1976, ABS commenced publishing “estimated residential populations”, ie. excluding visitors but including residents away at the time of the census.

In the following tables, from 1976 to 2011, both estimated residential and total census count type figures are given for Cairns Statistical District.

From 2011, a new system was adopted by ABS with Cairns as an urban area being effectively covered by the two Statistical Area Level 3 (SA3) areas of Cairns North and Cairns South reflecting boundaries close to the old Cairns Statistical District boundaries. ABS published figures on these boundaries back to 1991.

2008						137,672
2009						142,287
2010						145,330
2011			158,888			147,505
2012						150,578
2013						153,405
2014						155,490

Note 1 : See Definitions Section 1.

Note 2 : This census was taken at the time of school holidays with an abnormally large number of visitors in the count.

3. POPULATION GROWTH RATES

The following gives average annual population rates (mainly by decades).

<u>CAIRNS CITY LGA</u>	
<u>(Total population including visitors & excluding residents away)</u>	
1891 - 1901	3.6% pa
1901 - 1911	2.3% pa
1911 - 1921	4.1% pa
1921 - 1931	3.5% pa
1931 - 1941	4.1% pa
1941 - 1951	1.7% pa World War II
1951 - 1961	3.1% pa
1961 - 1971	2.0% pa > 1960s slow down, increasing
1971 - 1976	2.9% pa > overspill into Mulgrave Shire
<u>CAIRNS STAT DISTRICT</u>	
<u>(Residential Population)</u>	
1976 - 1986	3.6% pa
<u>CAIRNS STAT DISTRICT</u>	
<u>(Revised) (Residential Population)</u>	
1986 - 1991	3.1% pa
<u>CAIRNS COMBINED NORTH & SOUTH</u>	
<u>SA3s</u>	
<u>(Residential Population)</u>	
1991 - 2001	2.5% pa
2001 - 2011	2.8% pa
<u>LONG TERM AVERAGE</u>	
129 years (1891 - 2011)	3.4% pa

4. COMMENT

World War II caused a drop in population but was offset to some degree by a strong resumption of growth after the war. The 1960s saw slower growth in Cairns City due to poorer conditions in the sugar industry and a curtailment of expansion. Also by this time, Cairns' population was starting to spill over substantially into Mulgrave Shire.

Growth was curtailed in the late 1990s by the effects of the Asian Crisis and in the second half of the 2000s by the Global Financial Crisis.
